

# BCS Foundation Certificate in Information Security Management Principles

Information security has become the cornerstone of organizational success, in a world full of Cyber Security attacks and information theft and compromise. In order to protect your organization, the prestigious BCS Foundation Certificate in Information Security Management Principles is an essential tool. This comprehensive training and certification program offered by the esteemed British Computer Society (BCS) provides top and mid-level managers, and aspiring leaders with the critical knowledge and skills to navigate the evolving landscape of information security management and protection.

## Why Choose BCS Foundation Certificate?

As technology continues to reshape the business landscape, information security management has emerged as a mission-critical discipline. This distinguished certification equips you with the expertise needed to excel in your managerial role and provides a stepping stone for your professional growth. With the BCS Foundation Certificate, you'll be prepared to safeguard your organization's invaluable assets against ever-evolving cyber threats.

## What You'll Gain:

**Comprehensive Knowledge:** Master the core concepts and principles of information security management, including risk assessment, security standards, and legislative compliance.

**Acclaimed Accreditation:** Earn a globally recognized credential from the renowned British Computer Society, enhancing your professional credibility and boosting your career prospects.

**Strategic Thinking:** Develop a keen awareness of the technical and business environments in which information security management operates, enabling you to make informed decisions.

**Practical Expertise:** Dive into the intricacies of procedural, technical, and physical security controls, gaining the know-how to implement effective safeguarding measures.

## About US

### Specto

Specto is a specialized company in software development and professional training. It was responsible for the operation of the ICDL program in Jordan under the umbrella of UNECSO Cairo Office during the period 2001 and 2011. Since 2011 and until now, it has been responsible for the ICDL Program in 10 countries in the Middle East and North Africa, reporting directly to the ICDL Foundation, Dublin, Ireland.

Specto has an agreement with the British Computer Society (BCS) to administer the BCS professional certificates in the Arab countries. Specto has offered training and conducted examinations of BCS Foundation Certificate in Artificial Intelligence and BCS Foundation Certificate in Business Analysis in Jordan, Kuwait and Saudi Arabia.

Specto developed one of a few Automated Testing Systems in the world for ICDL tests, which is available in Arabic, English and French. It also developed a Management Information System that is used in about 15 countries in the MENA region.

Specto is working now on a unique Property Management System that uses the most recent technologies such as Blockchain, Smart Contract, and Artificial Intelligence, which will be used in one of the largest real estate projects in the Gulf area.

## British Computer Society

British computer society is a non-profit organization that was established in 1957. It is the Chartered Institute for Information Technology since 1984. The work of BCS is focused on **supporting careers, sharing expertise, improving education, influencing practice, and driving standards**. To achieve this, BCS offers 93 professional certificates in 13 main disciplines to supply the market with the required professionals.

BCS and Specto agreed to launch and offer number of BCS certificates in the Arab countries from 4 main disciplines, the most required disciplines according to a market study performed by BCS. This will be the first stage, which will be followed by other certificates in the future.

A simple search over the internet can show the numbers of available vacancies for these disciplines.

## Your Learning Journey:

**Expert Instruction:** Learn from seasoned industry professionals and certified trainers who will guide you through the latest information security management principles.

**Real-World Relevance:** Our training focuses on practical applications, ensuring that you can immediately apply your knowledge to protect your organization.

**Active Workshops:** Engage in hands-on workshops and simulations, fostering a dynamic learning that caters to all learning styles.

**Peer Networking:** Connect with a diverse group of like-minded professionals, building lasting relationships that extend beyond the training room.

## Why You Need This Certification:

**Career Advancement:** Demonstrate your commitment to excellence and distinguish yourself in the competitive job market.

**Organizational Value:** Equip your organization with informed leaders who can safeguard critical information, ensuring continued growth and success.

**Confidence in Decision-Making:** Gain the confidence to make strategic decisions and respond proactively to potential threats.
